

Abstract of a paper to be presented at the
10th Berlin IO Day, on September 28th, 2018:

Organizing Competition for the Market

Patrick Rey, Toulouse School of Economics (joint with Elisabetta Iossa and Michael Waterson)

The paper studies the competition for the market in a setting where incumbents (and, to a lesser extent, neighbouring incumbents) benefit from a cost advantage. The paper first compares the outcome of staggered and synchronous tenders, before drawing the implications for market design.
