## 1 General Information

The file BIOREGION contains information about the place of birth and the place where refugees first accommodation in Germany. Respondents provide this information in plain text. This information is then coded into different coding schemes. For places outside Germany only nation codes are provided. Is the place reported within Germany, codes for federal states, counties as well as municipalities are used. Because sometimes it is not clear which code is the correct code based on the textstring provided by the respondent, all possible codes are provided (for example there are several cities called Neustadt in Germany).
