The variable names mentioned in this document belong to a collection of datasets, which is released with doi:10.5684/soep.core.v40o.

## Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

The diagram illustrates the structure of a questionnaire entry. It shows two questions, Q72 and Q73, with their respective options and variable definitions. The labels on the left indicate the different parts of the entry:

- question number:** Q72, Q73
- question text:** "Now we would like to know something about you personally. Were you born in Germany?" and "What country were you born in?"
- interviewer instruction:** "This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth." and "Please enter the current name!"
- answer options:** Yes (1), No (2), No answer (-1)
- in blue: identifier for filter:** Q72:lsta1, Q73:lsta2
- in blue: filter with condition:** bio I0013, bio I0016
- grey bar: open or numeric answer:** (represented by a grey bar)

Labels on the right indicate the color coding for variable definitions:

- in green:** dataset name (bio), variable name (I0013, I0016), variable label (born in Germany, Country Of Birth)

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

**Intro** Our scientific study is interested above all in tracing changes in people's work and family lives. That means we need certain information without any gaps from year to year. Since we weren't able to interview you last year, there are a few gaps that we would like to fill with these questions.
