## Reading Aid

This representation of the questionnaire contains the same informations as the portal `paneldata.org`.

The diagram shows a questionnaire entry for Q72. On the left, labels with arrows point to specific parts of the entry:

- question number**: points to **Q72**
- question text**: points to **Now we would like to know something about you personally. Were you born in Germany?**
- interviewer instruction**: points to *This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.*
- answer options**: points to a table:
 

Yes	1
No	2
No answer	-1
- in blue: identifier for filter**: points to `Q72:lsta1` (highlighted in blue)
- in blue: filter with condition**: points to `Q72:lsta1=2` (highlighted in blue)
- grey bar: open or numeric answer**: points to a grey bar below the question.

On the right, a legend indicates that green text represents:

- dataset name: `bio`
- variable name: `I0013`
- variable label: `born in Germany`

Below the grey bar, the entry for Q73 is shown:

**Q73** What country were you born in?  
*Please enter the current name!*

Below this, the variable definition is shown: `Q73:lsta2 bio I0016 Country Of Birth`

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form `2 @ Q73`. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].
